Understanding epilepsy workshop for Registered Nurses

Workshop objectives:

- Attain the skills and knowledge to effectively support an individual with epilepsy
- Explain and review epilepsy
- Identify seizure activity and record seizures specific to each individual
- Review and implement individualised Epilepsy Management Plan
- Identify key components to managing seizure activity:
 - AEDS
 - Seizure first aid
 - Other treatments
- Identify key strategies to manage epilepsy based on the Registered Nurses workplace.

Workshop outline:

- The facts about epilepsy
- Different types of seizures
- Seizure triggers
- Diagnosis
- Medication and treatment
- Seizure first aid
- Epilepsy Management Plan and support documents
- Co-presenting conditions and impacts.

Unique value of workshop:

- The workshop has been designed and piloted with Eastern Health Neuroscience Nurses, who overwhelmingly rated the session as highly relevant, practical and comprehensive
- Registered nurses will participate in a current, research-based workshop that is interactive and supported by excellent resources
- A person-centred approach emphasises the importance of involving the person and their circle of support.
